REMARKS

Claims 1-8 were pending in the Application. Applicant respectfully requests entry of the above amendments to the specification and consideration of the enclosed remarks. Accordingly, Claims 1-8 will remain pending in the application.

In section 2 of the Office Action, the Examiner rejected Claims 1-8 under 35 U.S.C. 102(b) as allegedly anticipated by U.S. Patent No. 5,995,950 to Barns-Slavin, et al. ("Barns-Slavin '950"). Applicants respectfully traverse the rejection.

Applicants submit that the invention as presently claimed is patentable over the cited reference. Applicant respectfully submits that the Examiner has not provided a prima facie case of anticipation that teaches each element of Claim 1. For example, Claim 1 recites a stop table, for storing attributes associated with a stop, which is in turn associated with a load, which is in turn associated with a group, each record having a group identifier field, a load identifier field, a stop identifier field, and a drop bill number field. Accordingly, Claim 1 is therefore patentable for at least that reason. Claim 5 also includes such a recitation and Applicants respectfully submit that Claim 5 is also patentable for at least that reason.

Claims 2-4 and 6-8 depend directly or indirectly from Claim 1 or 5, respectively are therefore patentable over the cited reference for the reasons stated above with reference to Claims 1 and 5.

Accordingly, Applicant respectfully submits that Claims 1-8 are patentable over the cited reference and respectfully requests that the rejection be withdrawn.

Accordingly, Applicant submits that claims 1-8 are in condition for allowance and respectfully requests the Examiner withdraw the rejections to the claims.
